### Features

- Fast & High bonding application.
- · Economical & long lasting.
- · Easy to Maintain, Repair & Recoat.
- Moisture, water & stain protection.
- Thin, lightweight & seamless application.
- Highly Customize with multiple colours & finish range.
- Great alternative of natural stone / finish / texture.
- Low VOC with Environment friendly Product.
- Expert application team equipped with latest tools & accessories.
- Ideal for any Interior, Exterior & Landscaping surfaces.

About – "Aggregate Paving" is a handcrafted Fusion of traditional Art of in-situ decorative concrete rendition with vibrant base colours with multiple color aggregate options, the material offers several technically enhanced properties over the conventional Cementations wall renders. Can be used for Interior, exterior & Façade spaces, compound walls, concrete planters etc.

Composition - Stone Crete Plaster is composed of a mix of Grey / White cement, coarse aggregate (usually crushed stone), fine marble powder, polymers & chemicals.

Application - It is a self-drying, on site application. Its 1 coats plaster system having thickness of 8 to 10.00 mm. Ideal for exterior surfaces, facades of Government Institutes, commercial, residential, corporates buildings, educational Institutes, Farm House, Hotels & Resorts etc..

Colours & Shades – To be choose from the shade card.

Patterns / Effects -

- · Vertical & horizontal Groove
- Up to 2 colour combination possible.
- Widest choice of pastel & mix natural aggregates.
